PROFILE

Frontend engineer with 5+ years of experience in web development. Specializing in building responsive and performant SPA and SSR applications using modern JavaScript frameworks and cloud technologies. Strong problem-solving skills and a passion for clean, maintainable code, with a focus on frontend architecture, performance, and developer experience. Active contributor to open source.

EXPERIENCE

ASTRA LINUX

02/2024 - Present

SENIOR FRONTEND DEVELOPER

- Developed and maintained two products: a low-code platform for creating web applications (including a technical service system for a famous airline) and a collaborative CRM for internal staff with custom modules for task tracking, salary management, and an internal company shop — averaging ~960 daily active users.
- Designed and shipped a full-fledged frontend application builder: an AST-based application model, visual editor, custom Vue-component AST parser (Babel), runtime renderer, and a Node.js / NestJS bundler microservice for compilation and deployment.
- Implemented integration with the backend via OpenAPI with automatic generation of backend REST API types. Led the integration of Token Studio in the design team, with automatic generation of CSS variables on the frontend. Both solutions eliminated repetitive manual integration work, freeing roughly 20 story points of team capacity per sprint.
- Led the integration of AI tools with working environments: MCP integrations with Figma and Jira, CodeRabbit for GitLab, and agent rules.
- Implemented advanced performance optimizations for the visual editor — viewport culling, QuadTree-based spatial selection, and topological-sort hoisting — sustaining 60 fps with ~1,100 nodes on canvas and reducing selection lag from 400 ms to 100 ms.
- Built and maintained a monorepo for the platform's frontend tooling using pnpm, Turborepo, TypeScript, Vite, and Changesets, enabling scalable development and independent package versioning.
- Designed, developed, and maintained the company's UI kit of 20+ components from Figma designs using Reka UI, shadcn-vue, and Tailwind. Led the CRM platform redesign, including migration from Naive UI to the UI kit.
- Led the migration from a legacy React codebase to Nuxt, improving page-load performance, SEO, and long-term maintainability while streamlining the developer experience.
- Led an architectural refactoring to Feature-Sliced Design (FSD), including removal of unused dependencies and major-version npm upgrades — improving long-term maintainability and security.
- Mentored junior developers and conducted code reviews to maintain code quality.
- Day-to-day frontend duties: forms via TanStack Form and Zod, REST integrations, WebSockets, and more.

HUAWEI

11/2020 - 02/2024

MIDDLE FRONTEND DEVELOPER

- Developed and maintained a cloud-based CAD/CAE platform for engineering workflows.
- Led the migration of a large production frontend from Vue CLI (Webpack) to Vite, including custom plugins and configuration work — significantly improving developer experience and cutting cold-start dev-server time from ~2 minutes to seconds (up to 60× faster).
- Developed complex, high-performance UI components with Vue 3, TypeScript, Pinia, and SCSS — including virtual scrolling, dynamic widgets from JSON schemas, and role-based authorization.
- Designed an abstraction layer over Playwright enabling engineers (including non-frontend) to author E2E tests and create interactive presentations.
- Built automated testing coverage with Playwright (E2E) and Vitest (unit), with nightly auto-runs — reducing regressions by 28%.
- Collaborated cross-functionally and internationally, discussing requirements and reviewing code in English with distributed teams (including Chinese colleagues).

SKILLS

LANGUAGES JavaScript · TypeScript · HTML · CSS · SCSS

FRAMEWORKS Vue / Nuxt · React / Next.js · Svelte · Node.js · NestJS · Express

CLOUD & DEPLOYMENT Netlify · Vercel · Firebase

TOOLS pnpm / bun / npm · Vite · Tailwind CSS · Vitest · Playwright · Turborepo · Webpack

HELPERS Zod · Reka UI / Headless UI · TanStack · shadcn · Changesets

COLLABORATION Jira / Confluence · Figma · Git (GitHub / GitLab)

EDUCATION

LOBACHEVSKY STATE UNIVERSITY OF NIZHNY NOVGOROD

2019 - 2023

Bachelor of Applied Computer Science

- GPA: 3.34/4.0
- Relevant coursework: Data Structures, Algorithms, Database Systems, Web Development
- Senior project: C# application solving the Traveling Salesperson Problem with an Evolutionary Genetic Algorithm; thesis comparing this solution with other heuristic algorithms.

LANGUAGES

RUSSIAN / NATIVE

ENGLISH / UPPER-INTERMEDIATE
