

# RASTEN REMIZOV

## SENIOR FRONTEND DEVELOPER

**LOCATION** Yerevan, Armenia (UTC+4) **EMAIL** rasten.remizov@gmail.com **WEBSITE** rastuharem.netlify.app  
**LINKEDIN** linkedin.com/in/rasten-remizov **GITHUB** github.com/rastuhacode **TELEGRAM** t.me/rastuharem

## PROFILE

I'm a Senior Frontend Engineer with 5+ years building enterprise web platforms in TypeScript, Vue/Nuxt, and React, specializing in scalable SPA and SSR applications, frontend architecture, performance optimization, and developer tooling. I've designed, shipped, and maintained enterprise applications used by thousands of users. I'm also an open source contributor to Vue and React ecosystem libraries including Reka UI, TanStack, and bpmn-js.

## EXPERIENCE

### SENIOR FRONTEND DEVELOPER AT ASTRA LINUX

02/2024 - Present

- Core frontend developer on two enterprise platforms — a low-code application builder and an internal CRM — used daily across 4 business departments. Drove frontend architecture decisions, owned code review, and mentored 4 engineers.
- Architected and shipped an enterprise low-code application builder from scratch (AST compiler, visual editor, runtime renderer, deployment pipeline), enabling 3 non-frontend teams to ship 7 fullstack applications without engineering involvement.
- Authored the frontend architecture RFCs adopted as standard across 3 teams, covering design system API boundaries and monorepo package structure.
- Optimized the visual editor's rendering pipeline with viewport culling and QuadTree spatial indexing, sustaining 60 FPS at 1,100+ canvas nodes and cutting interaction latency 75% (400 ms → 100 ms).
- Built the frontend platform monorepo (pnpm, Turborepo, Vite, Changesets, 6 independently versioned packages) and automated REST client generation from OpenAPI plus design-token sync from Token Studio, removing ~18 hours of manual integration work per sprint.
- Built and own the company-wide design system — 20+ custom components based on shadcn-vue, Reka UI and Tailwind CSS — adopted by 6 teams across 8 products, with WCAG 2.1 AA enforced by automated axe checks in CI.
- Led migration of a legacy React SPA to Nuxt, improving LCP from 5.5s to 2.1s and reducing bundle size 30%, while consolidating both platforms onto one shared toolchain.
- Introduced the team's AI-assisted development workflow (CodeRabbit reviews, Figma/Jira MCP integrations, shared agent rules), cutting median PR review turnaround from 2 days to 12 hours.

### FRONTEND DEVELOPER AT HUAWEI

11/2020 - 02/2024

- Developed and delivered frontend features for a cloud CAD/CAE simulation platform used in a distributed team of 32 across Russia and China.
- Owned migration from Vue CLI/Webpack to Vite, cutting local dev startup from ~2 minutes to under 15 seconds for a team of 6 engineers.

- Developed complex, high-performance UI components with Vue 3, TypeScript, Pinia, and SCSS — including virtual scrolling, dynamic widgets from JSON schemas, and role-based authorization.
- Added Playwright (E2E) + Vitest (unit) coverage with nightly CI runs, reducing regressions by ~28%.
- Designed a Playwright abstraction that let 13 engineers author their own E2E tests and automated presentations, removing the frontend team as a bottleneck.
- Worked in English daily with distributed teams across Russia and China for 3+ years.

## SKILLS

### CORE

TypeScript, JavaScript, HTML, CSS, SCSS

### FRAMEWORKS

Vue 3, Nuxt, React, Next.js, Node.js, NestJS

### STATE & DATA

Pinia, TanStack Query, Zod, REST, OpenAPI

### UI & DESIGN SYSTEMS

Tailwind CSS, Reka UI, shadcn-vue, Base UI, Figma, Token Studio, WCAG 2.1 AA

### TESTING

Vitest, Playwright, Testing Library

### BUILD & TOOLING

Vite, Webpack, Turborepo, pnpm, Changesets, GitHub Actions, GitLab CI

### PRACTICES

Frontend architecture, monorepos, performance optimization, design systems, code review, Agile / Scrum

## EDUCATION

### LOBACHEVSKY STATE UNIVERSITY OF NIZHNY NOVGOROD

2019 - 2023

#### Bachelor of Applied Computer Science

- Senior project: C# application solving the Traveling Salesperson Problem with an Evolutionary Genetic Algorithm; thesis comparing this solution with other heuristic algorithms.

## LANGUAGES

RUSSIAN / NATIVE

ENGLISH / PROFESSIONAL WORKING PROFICIENCY (B2)
