SUMMARY

Senior Frontend Engineer with 5+ years building enterprise web applications in TypeScript, React/Next.js and Vue/Nuxt, specializing in scalable SPA and SSR applications, frontend architecture, performance optimization and developer tooling.
Open-source contributor to Vue and React ecosystem libraries including Vite, Nuxt, TanStack, Reka UI.

WORK EXPERIENCE

ASTRA CONSULTING (Low-code builder platform and internal CRM products)

Moscow, Russia

Senior Frontend Engineer

Feb 2024 – Jun 2026

- Enabled **3 non-frontend teams to ship 7 full-stack applications without frontend engineering involvement** by architecting and delivering an enterprise low-code application builder from scratch, including its AST compiler, visual editor, runtime renderer and deployment pipeline.
- Eliminated **18 hours of manual integration work per sprint** by building a frontend platform monorepo with pnpm, Turborepo, Vite, Changesets and 6 independently versioned packages, while automating REST client generation from OpenAPI and design-token synchronization from Token Studio.
- Drove adoption of a company-wide React design system across **6 teams and 8 products** by designing and maintaining **20+ reusable and accessible components** with shadcn, Base UI and Tailwind CSS.
- Reduced visual-editor interaction latency by **75% from 400 ms to 100 ms** and sustained **60 FPS with 1,100+ canvas nodes** by optimizing the rendering pipeline with viewport culling and QuadTree spatial indexing.
- Standardized frontend architecture across **3 engineering teams** by authoring and driving adoption of RFCs defining design-system API boundaries and monorepo package structure.
- Cut median PR review turnaround from **2 days to 12 hours** by introducing an AI-assisted development workflow using CodeRabbit, Figma/Jira MCP integrations, shared agent rules and n8n automation.

HUAWEI (Cloud CAD/CAE simulation platform product)

Nizhny Novgorod, Russia

Frontend Developer

Nov 2020 – Feb 2024

- Decreased local development startup time from **approximately 2 minutes to under 15 seconds for a 6-developer team** by leading the migration from Vue CLI/Webpack to Vite.
- Reduced production **regressions by 28%** by building automated E2E and unit testing infrastructure with Playwright and Vitest and introducing nightly test runs.
- Enabled **13 engineers to independently create E2E tests and automated presentations** by designing a reusable Playwright abstraction, removing the frontend team as a testing bottleneck.

SKILLS

Languages: TypeScript/JavaScript, HTML/CSS

Frameworks: React/Next.js, Vue/Nuxt, Node.js, Nest.js

State and Data: Pinia, Zustand, Redux, TanStack, Zod

UI and Design System: Tailwind CSS, shadcn/ui, Base UI, Nuxt UI, Reka UI, SCSS

Testing: Vitest, Playwright, Cypress, Jest

Build and Tooling: Vite, Webpack, Turborepo, pnpm, Bun, Changesets, GitHub Actions, GitLab CI

EDUCATION

LOBACHEVSKY STATE UNIVERSITY OF NIZHNIY NOVGOROD

Nizhny Novgorod, Russia

Bachelor of Applied Computer Science

Sep 2019 – Sep 2023

LANGUAGES

English: Professional Working Proficiency

Russian: Native
